Video/Speaker Observation Form

Video Title/Speaker: Mr. Wilton

Subject summary: Today Mr. Wilton talked about these special cameras he designed and created for a hospital to use to record surgeries. He showed us multiple drawings and renderings of the cameras he is making. What surprised me was how good the doctors hand drawings were. I could not draw that good by hand.

Coolest thing you learned: The coolest thing I learned was that Mr. Wilton and Dr. Neat met by chance at a competition and then that turned into a 10 year and continuing mentorship from Mr. Wilton.

What you disliked: I disliked that Mr. Wilton was the one who had to pay extra for certification. I think the buyer should have paid for it or included that fee in the purchase price
